

Nors Panel

2025–2026

2025-2026 Nors Panel

Nors Panel: Advanced Thermo-Bonded Panels

Nors Panel represents a revolutionary series of thermobonded panels, characterized by variable density, crafted through cutting-edge engineering techniques.

Boasting a trifecta of remarkable attributes—lightweight, high performance, and a unified material structure—the panels from this collection present an array of choices in terms of size, shape, and finishing.

These panels are not only ideal for effective thermal insulation, guarding against both heat and cold, but they also excel in delivering superior sound insulation for various spaces, ensuring optimal acoustic clarity and tranquility.
